

BRILLIANT
with unique micro-ground finish

Improve your quality and efficiency!

Applications

- premium packages
- coated or laminated materials
- alloy-coated cardboard boxes
- foils and plastics
- materials difficult to diecut

Special advantages

- optimal diecutting results
- smooth penetration into the material
- reduction of pressure
- no dust
- increased lifetime

Technical Information

- quality: Special 60W - micro-ground finish
- edge hardness: TopDurFlex approx. 60 HRc. \pm 2HRc.
- body hardness: H2 approx. 32-34 HRc. - bendable
- hardening depth: min. 0,2mm
- bevel geometrie: 42° angle
