

**Special 60W™  
dust-free die cutting**

**polished and microfinished patented steel rule**

## Applications

- premium packages
- coated or laminated materials
- alloy-coated cardboard boxes
- foils and plastics
- materials difficult to die cut

## Special advantages

- optimal die cutting results
- smooth penetration into the material
- reduction of pressure
- no dust
- increased lifetime

## Technical Information

- quality: Special 60W - micro-ground finish
- edge hardness: TopDurFlex up to 66 HRc.  $\pm$  2HRc.
- body hardness: H2 approx. 32-37 HRc. - bendable
- hardening depth: min. 0,15 mm
- bevel geometrie: 42° or 54° angle
